The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ziegler in view of Knight and Margolin.

Ziegler provides full response to claim 1 except for the "film member" and "sealable air inlet". See the cylindrical member 1, air bag 13, piston 8 and tip 2. Knight teaches the use of a "valve" on an air bulb and Margolin teaches the use of a modern day seal 91, in the form of an adhesive backed film. To employ the respective perfecting features in the Ziegler environment would have been obvious to the ordinary artisan as they are shown used in an identical art device.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over the art as applied to claim 1 above, and further in view of JP02003160798A.

It would have been obvious to the ordinary artisan to employ this well known cleaning agent in the combination supra.
